U. S. DEPARTMENT OF AGRICULTURE
Bureau of Animal Industry
Animal Husbandry Division

Issued March 1940
Revised January 1941

U. S. RECORD OF PERFORMANCE BREEDERS
PARTICIPATING IN
THE NATIONAL POULTRY IMPROVEMENT PLAN

The publication of this list is for the purpose of developing greater efficiency in the operation of the National Poultry Improvement Plan. Additional information regarding these breeders may be obtained by writing to them or to the official State agency in their respective States. This list will be revised periodically.

Foreword

The U.S.R.O.P. breeders listed in this publication are participating in the National Poultry Improvement Plan, according to reports submitted by the official State agencies. The breeds are listed in the order of the number of flocks participating and the breeders are listed alphabetically under each breed.

With a few exceptions, the status of pullorum control for each flock is indicated. When no class is indicated it does not necessarily mean that the flock is not tested for pullorum disease, since some breeders do private testing and others have their flocks tested under State supervision but not in accordance with the requirements of the National Poultry Improvement Plan.
